After page 40, please insert pages 41 through 51 which contain the sequence listing for the subject invention. Please renumber the remaining pages accordingly.

In the Claims

Please cancel claims 1-35 without prejudice or disclaimer of their subject matter.

Please add the following new claims:

--36. A tumor vaccine for administration to a patient, wherein said tumor vaccine comprises tumor cells which present a first set of peptides in an HLA context, wherein said first set of peptides are derived from tumor antigens, and wherein at least some of said tumor cells have at least one MHC-I haplotype of said patient on the cell surface, and wherein said tumor cells further comprise a second set of peptides which act as ligands for said MHC-I haplotype and wherein said second set of peptides are selected from the group consisting of:

(a) peptides which are different from peptides which are derived from proteins expressed by the cells of said patient; and
